

Temperature Sensors

6009 Series

Engineering Information:

- NTC thermistor probe assembly
- Standard lug sizes #4 - #12 with additional styles available
- Typical wire sizes #24 - #28 AWG
- Housing material options: tinned copper or nickel-plated steel
- Fast temperature response
- RoHS compliant options available

Series Information:

QTI's 6009 Series of ring lug temperature sensors offer a cost-effective surface temperature sensing solution for a variety of industry applications. They are available in a variety of sizes, with or without insulation. The ring lug design allows for the sensor to be mounted to a stud or bolt to monitor equipment temperature.

QTI can customize these sensors in a variety of ways. Sensor resistance values and accuracy, as well as cable length and color are all able to be specified.

QTI is the unparalleled leader in world-class temperature sensing technology with over for 40 years of proven expertise for the most demanding customers in the world. We custom-engineer the industry's most reliable temperature sensors for mission-critical applications. As a true business partner, we deliver beyond the products we make as we relentlessly pursue excellence in everything we do.
