

## Temperature Probes

### 6025 Series

#### Engineering Information:

- NTC thermistor assembly
- Available in a variety of sizes with or without insulation
- Standard lug sizes #4 to #12 with additional styles available
- Typical wire sizes #24 to #28 AWG
- Housing material options: tinned copper or nickel-plated steel
- RoHS compliant options available

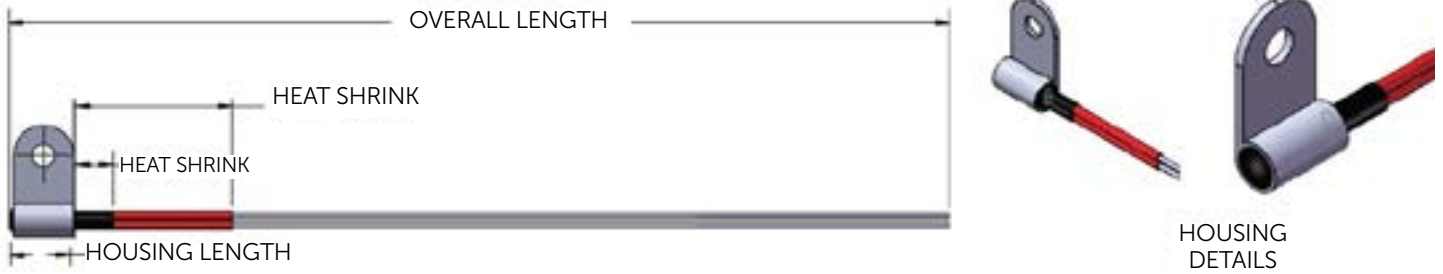

#### Series Information:

The 6025 flag ring lug probe sensor is a cost effective solution for surface temperature measurement and can be customized to meet any industry or application requirement.

QTI can customize these sensors in a variety of ways. Sensor resistance values and accuracy, as well as cable length and color are all able to be specified.

QTI is the unparalleled leader in world-class temperature sensing technology with over 40 years of proven expertise for the most demanding customers in the world. We custom-engineer the industry's most reliable temperature sensors for mission-critical applications. As a true business partner, we deliver beyond the products we make as we relentlessly pursue excellence in everything we do.
