

## Boilers & Water Heating

### 6026 Series

#### Engineering Information:

- NTC thermistor probe assembly
- #24 AWG standard leads
- Quicker response available with smaller element
- Operating temperature range: -40°C to 105°C
- Housing material: stainless steel, brass ring
- UL compliant options available

#### Applications:

- Instant water heaters
- Heat pumps
- Toilet seat heating
- Floor heating
- Cogeneration systems

#### Series Information:

QTI's 6026 Series is a durable NTC thermistor probe for measuring liquid temperature in the boiler and water heating industries including instant water heaters, heat pumps, toilet seat heating, floor heating, and cogeneration systems. QTI can customize the 6026 series in a variety of ways. Sensor resistance values and accuracy, as well as cable length/color and housing size are all able to be specified.

QTI can customize these sensors in a variety of ways. Sensor resistance values and accuracy, as well as housing size can be customized.

QTI is the unparalleled leader in world-class temperature sensing technology with over for 40 years of proven expertise for the most demanding customers in the world. We custom-engineer the industry's most reliable temperature sensors for mission-critical applications. As a true business partner, we deliver beyond the products we make as we relentlessly pursue excellence in everything we do.
