

HVAC & Refrigeration

6035 Series Sensors

Engineering Information:

- Available with a thermistor or RTD sensing element
- Typical wire size #22 to #26 AWG
- Material: Stainless Steel
- Typically used for air temperature measurement where response time is critical
- Also available for use with QTI's micro thermistor for even faster response times
- RoHS compliant options available

Applications

-
-

Series Information:

This "birdcage" temperature sensor is ideal for measuring air temperature. The open-ended shape of the sensor helps to protect the sensing element while reducing thermal mass.

QTI is the unparalleled leader in world-class temperature sensing technology with over 40 years of proven expertise for the most demanding customers in the world. We custom-engineer the industry's most reliable temperature sensors for mission-critical applications. As a true business partner, we deliver beyond the products we make as we relentlessly pursue excellence in everything we do.
