Using StripImageCTARight Style

When using the StripImageCTARight Style, changing the stripe image and how it displays is simple using the Snippets menu.

Let's take a look at how to apply this style to a content block and how to edit existing content blocks that utilize the StripImageCTARight Style.

Step 1

This style exists in the Snippets menu within your Titan Workstation.

To utilize a Snippet, select the content block you'd like the style to be applied to. Then, enter the Snippets menu via the icon in the upper center of your Titan Workstation.

For this example, we'd like to apply this image:

...to this Freeform Content Block:

A screenshot of the Titan CMS interface. The top navigation bar shows "CTS Corporate > About CTS > Careers". A left sidebar contains a menu with items like "Dashboard", "CTS Corporate", "Products", "Markets", "Resources", "About CTS", "Brands", "Careers", "History", "Investors", "Locations", "Sustainability & ESG", "Contact Us", "Bottom Nav", "Offical", "Files", "Product Family Tables", "Product Series", "Sales Contacts", and "Recycle Bin". The main content area shows a "Freeform" content block. The block has a header with "Industrial" and "Medical" buttons. Below the header, there is a text block: "With Over 20 Locations In 12 Countries And More Than 3,500 Employees, Our People Support Each Other To Improve Our Collective Capability And Achieve Excellence In All That We Do." and an orange button labeled "See Our Locations >". A red arrow points to the "Freeform" header of this block. Below this block is another "Freeform" block containing an image of a man in a lab coat looking at a computer monitor.

Step 2

Once in the Snippets menu, look for the Site-level Snippet Content section.

The screenshot displays the TITAN CMS 7.3 interface. At the top, a breadcrumb trail shows 'CTS Corporate > About CTS > Careers'. A search bar is visible on the left. The main navigation menu on the left includes 'Dashboard', 'CTS Corporate', 'Products', 'Markets', 'Resources', 'About CTS', 'Brands', 'Careers' (highlighted), 'History', 'Investors', 'Locations', 'Sustainability & ESG', 'Contact Us', 'Bottom Nav', 'OffNav', 'Files', 'Product Family Tables', 'Product Series', 'Sales Contacts', and 'Recycle Bin'. The main content area shows a list of snippets with a dropdown menu open, highlighting 'Site-level Snippet Content' with a red arrow. Below this, five snippet configuration fields are visible: 'StripeClass' (containing 'StripeImageCTARight'), 'ImagePath' (containing '/Files/About-CTS/locations-image.jpg'), 'StripeMinHeight' (containing '0'), 'OverlayColor' (containing '#000'), and 'OverlayOpacity' (containing '0'). The TITAN CMS 7.3 logo is at the bottom left.

Step 3

Under StripeClass, add "StripeImageCTARight".

The screenshot shows the TITAN CMS 7.3 interface. The breadcrumb navigation at the top reads "CTS Corporate > About CTS > Careers". On the left is a navigation menu with "Careers" selected. The main content area is titled "Site-level Snippet Content" and contains several configuration fields:

- StripeClass**: A dropdown menu with "StripeImageCTARight" selected. A red arrow points to this selection.
- ImagePath**: A text field containing "/Files/About-CTS/locations-image.jpg".
- StripeMinHeight**: A text field containing "0".
- OverlayColor**: A text field containing "#000".
- OverlayOpacity**: A text field containing "0".

At the top of the main content area, there is a list of modules with a right-pointing arrow: Google Tag Mana..., Google Tag Mana..., NWS Module Ma..., NWS Modules.Co..., and Open Graph Met....

The TITAN CMS 7.3 logo is visible in the bottom left corner of the interface.

Step 4

Under ImagePath, add the correct path for the image you'd like utilized in the style. If you use the Style with no image path selected, the Stripe will appear grey by default.

The screenshot displays the Titan CMS 7.3 interface for editing a 'Site-level Snippet Content'. The breadcrumb trail at the top indicates the path: CTS Corporate > About CTS > Careers. The left sidebar shows a navigation menu with 'Careers' selected. The main content area contains a configuration panel for the snippet. The 'ImagePath' field is highlighted in yellow and contains the path '/Files/About-CTS/locations-image.jpg', with a red arrow pointing to it. Other fields include 'StripeClass' (StripeImageCTARight), 'StripeMinHeight' (0), 'OverlayColor' (#000), and 'OverlayOpacity' (0). A dropdown menu is visible at the top of the configuration panel, listing options like 'Google Tag Mana...', 'NWS Module Ma...', 'NWS Modules.Co...', and 'Open Graph Met...'. The Titan CMS 7.3 logo is visible at the bottom left of the interface.

Stripe Minimum Height is 450 by default but can be adjusted if necessary to 0. You can also add Overlay or adjust Opacity settings in order to apply brand colors, or to adjust particularly bright or dark images.

Step 5

Once you're satisfied with your settings, click Publish.
